

If you arrive at the gate before sundown Friday, they will allow 5 cars in at one time to drive in and drop off your gear then return to the parking lot. As one car comes out another goes in. Then you will walk back to the site (about .3 mile) to set up. If you get there after dark they will escort a few cars at a time to drive in and drop of your gear then return to the parking lot. Then you will walk back to the site to set up.

These are there rules and child safety is there main concern!

I have an offer that might interest some of you and here it is: They will allow a trailer to be parked at the site (like Troop200 does). I have a large closed trailer that you can put your gear in and I will take it to the site. Tag your non-perishables, stop by my house Thursday night and we will load up. Call me before you come and I will let you know if there is room (919-656-3105). Jackson and I will be in camp by 3:00 pm Friday.
